### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: the title has been changed to "Liquid crystal dial having polarizing plate with cut out corresponding to transparent section of the dial"

### **DETAILED ACTION**

#### ***Allowable Subject Matter***

Claims 2, 6-11, and 13-14 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claims 2, 6-11 and 13-14, there is no prior art of record that teaches a displaying apparatus comprising: an LCD plate including a liquid crystal plate and polarizing plate; a light source disposed on a back side of a liquid crystal display plate for emitting illuminating light; and a dial plate disposed on the front of liquid crystal displaying plate and including an optically transparent displaying section transmitting light; the dial plate including a window provided therein for exposing a liquid displaying second provided on said liquid crystal displaying plate, and said illumination light illuminating said optically transparent displaying section by passing through said LCD

plate, wherein said polarizing plate includes a cut out at a portion corresponding to said optically transparent displaying section.

Schwartz (as cited in the previous office action) teaches a displaying apparatus comprising: a liquid crystal displaying polarizing plate including a liquid crystal plate and a polarizing plate; a light source disposed on a back side of said liquid crystal displaying plate for emitting illumination light; a dial plate disposed on the front side of crystal displaying plate and including an optically transparent displaying section capable of transmission of light; said illumination light illuminating said optically transparent displaying section by passing through said liquid crystal displaying plate the polarizing plate. However Schartz's polarizing plate does not include a cut out portion corresponding to the optically transparent display of displaying section and the prior lacks any teaching as such for form a cut out section in a polarizing plate to correspond to an optically transparent display section.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
